

EndNoteセミナー

EndNoteの機能紹介及び基本的な操作

EndNoteの主な2つの機能

1. 個人のライブラリとしての機能(文献管理機能)

・インターネット上での論文検索によって得られたデータを取り込んでデータベースを作成・整理・管理できます。

2. 論文作成時の大幅な時間・労力の削減

・投稿したい雑誌名を選択するだけで引用文献と参考文献リストを指定の投稿様式に自動的にフォーマットしてくれます。

注意事項

・また、使用するフィルタ・スタイルは指定するのは1回きりですが、事前に取り込む出版社の

インポートフィルタ アウトプットスタイル コネクションファイル

を指定しておかなければなりません。

・EndNoteには多数の ~ が存在していますが、出版社が変更(バージョンアップ)を行ったフィルタ・スタイルを取り込むにはEndNoteのホームページから取り込む必要があります。

(最後の参考に記述)

EndNoteへのデータ取り込みイメージ(1)

PubMedの検索結果データを

ご自身のPC(任意の場所)に一旦保存して

EndNoteに取り込む

EndNoteのPubMed直接検索機能を使って

PubMedの検索結果データをEndNoteに取り込む

EndNoteへのデータ取り込みイメージ(2)

前述の のどちらの方法にしても、下記の点を把握しておく必要があります。

新規のEndNoteライブラリに検索結果データを取り込むのか

既存のEndNoteライブラリに追加書きをするのか

EndNoteにおける文献引用の操作はWordとEndNoteを交互に行き来するため、この点を明確にしておかないと検索データをどこに保存したのか等の管理面、また引用する時に不都合が生じます。

既存のEndNoteライブラリに追加の場合は重複データの問題

EndNoteの重複除去機能によって解決

まず、「EndNote」を起動させます

The objective was to compare brain perfusion image using 3-dimensional stereotactic surface projection analysis of N-isopropyl-p-(123)I iodoamphetamine single photon emission computed tomography between Parkinson's disease patients with a high frontal assessment battery score and those with a low frontal assessment battery score. Thirty nondemented patients with Parkinson's disease were studied. Patients were divided into 2 groups: a high-scoring group whose frontal assessment battery score was 12 or more and a low-scoring group whose frontal assessment battery score was 11 or less. The high-scoring group included 21 patients, and the low-scoring group included 9 patients. They underwent N-isopropyl-p-(123)I iodoamphetamine single photon emission computed tomography, and we analyzed the data by the 3-dimensional stereotactic surface projection method. Results showed that left inferior parietal lobule and left supramarginal gyrus perfusion of the low-scoring group were significantly decreased compared with the high-scoring group. It is concluded that patients with Parkinson's disease may have frontal lobe dysfunction, but the decreased frontal assessment battery score may be caused not by progressed frontal lobe dysfunction but by parietal lobe dysfunction added to their preexisting frontal lobe impairment.↵

Reference Type: Journal Article

data of QOL, demographic, and diabetic information. The SF-36 instrument (Chinese edition) was used to assess QOL. Multiple stepwise linear regression analysis was also used to identify possible risk factors of QOL in elder DM. RESULTS: In subjects with elderly DM, the general assessment of perceived health was worse, compared with the normal elderly people; the mean score of multi-item dimensions assessment had been decreased, the lowest and highest scores of which on SF-36, respectively, were general health and body pain (ranged from 42.08 to 77.00). Based on the multiple stepwise regression analysis, 23 risk factors entered 9 multiple regressive models (9 dependent variables of which stand for the scores of 8 dimensions and the total score on SF-36) with different amount ultimately. Within the 13 risk factors that affect QOL of the elderly diabetic patients, the negative correlated factors were gender, age, payment ability of medical treatment, tumor, level of fasting plasma glucose (FPG), medicines purchasing channels, diabetic microvascular complications, diabetic macrovascular complications, acute complications, while the positive correlated factors were occupation, income, exercises, knowledge of DM. The multiple correlation coefficient square (R²) represented the above 13 risk factors had a totally 30.5% impact on the entire QOL. CONCLUSIONS: QOL of elderly DM population had significantly been decreased; QOL of the elderly patients in Shanghai community had many risk factors, which on one hand stated the complexity of elderly DM, and on the other hand gave us many useful and practical methods to improve QOL of elderly DM. Import Filters

Import filters are the files used by EndNote to decipher information that has been downloaded from an online or CD-ROM database. You can customize any of these import filters or create your own. Listed below are EndNote import filters available for downloading.

By clicking on the Filtering Options tab below you can select EndNote Filters for the data provider (e.g. National Library of Medicine) that most interests you. If you have trouble downloading the file you need, you can view an alphabetical listing of all available files and download them via FTP at our FTP site: [Mac](#) / [Windows](#)
